

OFFICIAL INFRASTRUCTURE RECORD

Rankuno AI Automation Infrastructure — Master Accounts & Setup Record

Consolidated inventory of created accounts, database configurations, GoDaddy DNS audit results, and deployment credentials checklist.

Document ID: RKN-REC-2026-V1

Prepared By: AI Lead

Effective Date: July 30, 2026

Account Email: Rankunoai@gmail.com

Credential Reference Note: The primary password configured for the platform accounts (GitHub, Supabase Database, Upstash, Sentry, Cloudflare) is: Rankuno@58615 .

1. Master Account Inventory & Status Registry

Service / Provider	Account Credentials / Username	Configured Resource / Project	Monthly Cost	Status
GitHub	rankunoai-dev (Rankunoai@gmail.com)	Repository: custom-tool (Private) Setting: Squash-Merge Only (Linear history enforced)	\$0 / mo	Active ✓
Supabase	Linked via GitHub (Rankunoai@gmail.com)	Project: rankuno-db Engine: PostgreSQL (Region: Mumbai ap-south-1) Default DB Password: Rankuno@58615	\$0 / mo	Active ✓
Upstash	Linked via GitHub (Rankunoai@gmail.com)	Database: rankuno-redis Engine: Serverless Redis (Region: Mumbai ap-south-1)	\$0 / mo	Active ✓
Railway.app	Linked via GitHub (rankunoai-dev)	Container Runner: Docker FastAPI Gateway & Celery Workers	~\$5 / mo	Active ✓
Sentry	Linked via GitHub (Rankunoai@gmail.com)	Organization: rankuno-ai Project: rankuno-platform (Python APM & Errors)	\$0 / mo	Active ✓
Cloudflare	Rankunoai@gmail.com	Domain DNS, Free SSL Encryption & DDoS Protection	\$0 / mo	Ready for DNS 🛡️

2. Domain Audit & Subdomain Routing Architecture

A live DNS audit was performed on Rankuno's domain rankuno.com to verify hosting and domain management details:

Property	Audited Value	Technical Details
Main Domain	https://rankuno.com/	Company Marketing Website — Stays 100% untouched and safe.
Domain Registrar & DNS Provider	GoDaddy	Nameservers: ns37.domaincontrol.com , ns38.domaincontrol.com
Main Site Hosting Server	Hostinger	Server IP: 185.214.132.81
Target Subdomain (API Gateway)	api.rankuno.com	CNAME record to Railway container gateway (to be added in GoDaddy).
Target Subdomain (Operator Dashboard)	app.rankuno.com	CNAME record to Railway UI (to be added in GoDaddy).

3. Environment Variables & Keys Wiring Checklist

When project execution begins, the following keys will be injected into local `.env` and Railway production variables:

```
# Environment Mode
ENVIRONMENT=development
LOG_LEVEL=INFO

# PostgreSQL Database (From Supabase rankuno-db)
DATABASE_URL=postgresql://postgres:Rankuno%4058615@db.xxxx.supabase.co:5432/postgres

# Redis Task Queue & Cache (From Upstash rankuno-redis)
REDIS_URL=rediss://default:[PASSWORD]@[HOST]:6379

# Error Tracking & APM Sentinel (From Sentry rankuno-platform)
SENTRY_DSN=https://[KEY]@o[ORG].ingest.sentry.io/[PROJECT]

# FinOps Spend Ceiling Guardrail
MAX_SESSION_SPEND_USD=5.00
```

4. Cost Summary & Financial Governance

- **Phase 1 Initial Operating Cost:** ~\$5.00 – \$10.00 / month total.
- **Zero-Debt Architecture:** Standard PostgreSQL, Redis, and Docker interfaces mean Rankuno can scale to enterprise AWS/GCP infrastructure in the future with **zero code changes**.
